Subject index

Acetal derivatives of D-glucitol, some 3,5-, 249
Active site of *E. coli* β-D-galactosidase, investigation by photoaffinity labelling, 227
Adsorption of pancreatic alpha-amylase onto starch crystallites, mechanism of the, 367
Agglutinin, studies of the molecular recognition of synthetic methyl β-lactoside analogues by *Ricinus communis*, 207
Aldos-2-ulase dehydratase from *Polyporus obtusus*, purification, characterization, and use in the synthesis of the antibiotic cortalcerone, 59
Alpha-amylase, mechanism of the adsorption onto starch crystallites of pancreatic, 367
5-Amino-1,4-anhydro-5,6-dideoxy-L-galactitol, synthesis of, 183
3-Amino-3-deoxy-D-alluronate, synthesis of methyl, 341
2-Amino-1,2-dideoxy-D-galactitol, synthesis of, 183
Aminoguanidine, the reaction of some dicarbonyl sugars with, 125
Anomeric dihalides reaction, 117
O-Antigen, polysaccharide of *Salmonella riogrande* O: 40 (Group R) related to blood group A activity, structure of, 143
Apple-fruit xyloglucans, a comparative study of enzyme digests of whole cell walls and of alkali-extracted xyloglucans, 303
L-Ascorbic acid, chemical reactions induced by ultrasound and γ-rays in aqueous solutions of, 291
L-Ascorbic acid 2-glucoside, crystal structure and physicochemical properties, 197
Aspergillus oryzae β-D-galactosidase, formation of oligosaccharides from lactitol by the action of, 151
Avobioside phenyl β-, avoparcin disaccharide component, L-ristosamine glycal, avoparcins α and β and helvecardins antibiotics, 107

2,4-*O*-Benzylidenehexitol unsaturated derivatives, rearrangement into *C*-glycosylbenzene derivatives, 17
Blocking group, stable but removable by ozonolysis: *O*-(3-butenyl), 375
O-(3-Butenyl), a stable blocking group removable by ozonolysis, 375

Conformational analysis of levanbiose by molecular mechanics, 1
Conformationally restricted derivatives of muramic acid based on oxazolidines from sugars, 235
Cortalcerone (an antiobiotic), synthesis from D-glucose using pyranose 2-oxidase and a novel fungal enzyme, aldos-2-ulose dehydratase, 59
Crystal and molecular structure of ethyl 6,7,8-tri-*O*-acetyl-5,9-anhydro-2,3,4-trideoxy-2-diphenylmethyleneamino-4-nitro-D-*threo*-D-*altro*-nononate, 321
Crystal structure of lactitol (4-*O*-β-D-galactopyranosyl-D-glucitol trihydrate, 189
α-Cyclodextrin, binding constants for complexes with L-phenylalanine and related substrates, 161
6-Deoxy-L-*arabino*-hexulose (L-rhamnulose) 1-phosphate, facile synthesis via regioselective phosphorylation of the unprotected sugar, 177
Deoxy-4′-fluorokanamycins A and B, synthesis of 4′-, 89
Dicarbonyl sugars, the reaction of some with aminoguanidine, 125

Enzyme digests of apple-fruit cell walls and of alkali-extracted oxyloglucans, a comparative study of, 303
Ethyl 6,7,8-tri-*O*-acetyl-5,9-anhydro-2,3,4-trideoxy-2-diphenylmethylene-amino-4-nitro-D-*threo*-D-*altro*-nononate, crystal and molecular structure of, 321

Free radical addition of alkenes, 117

L-Galactitol hydrochloride, 5-amino-1,4-anhydro-5,6,-dideoxy-, synthesis of, 183
D-Galactitol hydrochloride, 2-amino-1,2-dideoxy-, synthesis of, 183
4-*O*-β-D-Galactopyranosyl-D-glucitol (lactitol) trihydrate, crystal structure, 189
β-D-Galactosidase from *Aspergillus oryzae*, formation of oligosaccharides from lactitol by action of, 151
β-D-Galactosidase from *E. coli*, investigation of the active site by photoaffinity labelling, 227
Gentiobiosylenamines, synthesis by use of glucosylenamines as glycosyl acceptors, 47
D-Glucitol, some 3,5-acetal derivatives of, 249
D-Glucopyranose, synthesis and characterisation of 2-*O*-(6-*O*-L-*glycero*-α,β-D-*manno*-heptopyranosyl-α-D-glycopyranosyl)-α,β-, 33
Glucosylenamines as glycosyl acceptors: synthesis of gentiobiosylenamines, 47
Glycoconjugates and synthetic oligosaccharides, immunochemical characterization of polyclonal and monoclonal *Streptococcus* group A antibodies by chemically defined, 131
Glycosyl acceptors, synthesis of gentiobiosylenamines by use of glucosylenamines as, 47
C-Glycosylbenzene derivatives, rearrangement of unsaturated 2,4,-*O*-benzylidenehexitol derivatives into, 17
C-Glycosyl compounds, 117
Glycosylation by a modified thiocyanate method, stereospecific 1,2-*cis*-, C1
Glycosylation with pent-4-enyl and thioethyl glycosides, steric effect of a bulky 6-substituent in the I^+-promoted, 349

2-*O*-(6-*O*-L-*glycero*-α,β-D-*manno*-Heptopyranosyl-α-D-glucopyranosyl)-α,β-D-glucopyranose, synthesis and characterisation of, 33

Immunochemical characterization of polyclonal and monoclonal *Streptotoccus* group A antibodies by chemically defined glycoconjugates and synthetic oligosaccharides, 131

Kanamycin B and its analogs. Study on structure–toxicity relationships, synthesis of 5-deoxy-5-fluoro and 5-deoxy-5,5-difluoro derivatives of, 273
Kanamycins A and B, synthesis of 4′-deoxy-4′-, 89

Lactitol, formation of oligosaccharides by *Aspergillus oryzae* β-galactosidase action on, 151
Lactitol (4-*O*-β-D-galactopyranosyl-D-glucitol) trihydrate, crystal structure, 189
Levanbiose, conformational analysis of, by molecular mechanics, 1

Malto-oligosaccharides (dp 2–5), studies of the interaction of the maltose-binding protein of *E. coli* with 4,6-*O*-ethylidene-, 77
Maltose-binding protein of *E. coli*, studies of the interaction with 4,6-*O*-ethylidenemaltooligosaccharides (dp 2–5) and its regioselective labelling with 3-azibutyl 1-thio-α-(6-^{3}H) maltoside, 77
Methyl 3-amino-3-deoxy-D-alluronate, synthesis of, 341
Methyl β-lactoside analogues, studies of the molecular recognition by *Ricinus communis* agglutinin of synthetic, 207
Molecular mechanics, conformational analysis of levanbiose by, 1
Molecular recognition of synthetic methyl β-lactoside analogues by *Ricinus communis* agglutinin, studies of the, 207
Muramic acid, examples of conformationally restricted derivatives based on oxazolidines from sugars, 235

Nononate, crystal and molecular structure of ethyl 6,7,8-tri-*O*-acetyl-5,9-anhydro-2,3,4-trideoxy-2-diphenylmethyleneamino-4-nitro-D-*threo*-D-*altro*-, 321

Oxazolidines from sugars, examples of conformationally restricted derivatives of muramic acid, 235

Pent-4-enyl and thioethyl glycosides, steric effect of a bulky 6-substituent in the I^+-promoted glycosylation with, 349
L-Phenylalanine and related substrates, binding constants for complexes with α-cyclodextrin, 161
Photoaffinity labelling, investigation of the active site of *E. coli* β-D-galactosidase by, 227
Polysaccharide-*O*-antigen of *Salmonella riogrande* O:40 (Group R) related to blood group A activity, structure of, 143
Polysaccharides of *Streptococcus pneumoniae* types 19F and 19A, conformational analysis of the trisaccharide components of the repeating units of the capsular, 327
Pyranose 2-oxidase from *Polyporus obtusus*, purification and use in the synthesis of the antibiotic cortalcerone, 59

γ-Rays and ultrasound, chemical reactions in aqueous solutions of L-ascorbic acid induced by, 291

Rearrangement of unsaturated 2,4-*O*-benzylidenehexitol derivatives into *C*-glycosylbenzene derivatives, 17
Redox glycosidation: the use of Nozaki–Takai methylenation in a highly stereoselective synthesis of sucrose, 259
Regioselective labelling of the maltose-binding protein of *E. coli* with 3-azibutyl 1-thio-α-(6-^{3}H) maltoside, 77
L-Rhamnulose 1-phosphate, facile synthesis via regioselective phosphorylation of the unprotected sugar, 177
β-D-Ribofuranosyl acetates and trimethylsilyl azide, an improved preparation of 2,3,5-tri-*O*-acyl-β-D-ribofuranosyl azides by the Lewis acid-catalysed reaction of, 359

Starch crystallites, mechanism of the adsorption of pancreatic alpha-amylase onto, 367
Stereospecific 1,2-*cis*-glycosylation by a modified thiocyanate method, C1
Steric effect of a bulky 6-substituent in the I^{+}-promoted glycosylation with pent-4-enyl and thioethyl glycosides, 349
Streptococcus group A antibodies by chemically defined glycoconjugates and synthetic oligosaccharides, immunochemical characterization of polyclonal and monoclonal, 131
Streptococcus pneumoniae types 19F and 19A, conformational analysis of the trisaccharide components of the repeating units of the capsular polysaccharides of, 327
Structure–toxicity relationships, synthesis of 5-deoxy-5-fluoro and 5-deoxy-5,5-difluoro derivatives of kanamycin B and its analogs. Study on, 273
Sucrose, redox glycosidation: the use of Nozaki–Takai methylenation in a highly stereoselective synthesis of, 259
Sugars, dicarbonyl, the reaction of some with aminoguanidine, 125
1-Sulfenates, synthesis of 1-thioglycosides from 169
Synthesis and characterisation of 2-*O*-(6-*O*-L-*glycero*-α,β-D-*manno*-heptopyranosyl-α-D-glucopyranosyl)-α,β-D-glucopyranose, 33
Synthesis and properties of 1,1,3,3,-tetramethyl-2-(2,3,4,6-tetra-*O*-acetyl-α-D-glucpyranosyl)-uronium triflate, 353
Synthesis of 5-deoxy-5-fluoro and 5-deoxy-5,5-difluoro derivatives of kanamycin B and its analogs. Study on structure–toxicity relationships, 273
Synthesis of 4′-deoxy-4′-fluorokanamycins A and B, 89
Synthesis of methyl 3-amino-3-deoxy-D-alluronate, 341
Synthesis of 1-thioglycosides from 1-sulfenates, 169
Synthesis of sucrose, redox glycosidation: the use of Nozaki–Takai methylenation in a highly stereoselective, 259

1,1,3,3-Tetramethyl-2-(2,3,4,6-tetra-*O*-acetyl-α-D-glucopyranosyl)uronium triflate, synthesis and properties of, 353
Thiocyanate method, stereospecific 1,2-*cis*-glycosylation by a modified, C1
1-Thioglycosides from 1-sulfenates, synthesis of, 169
2,3,5-Tri-*O*-acyl-β-D-ribofuranosyl azides, an improved preparation by the Lewis acid-catalysed reaction of β-D-ribofuranosyl acetates and trimethylsilyl azide, 359
Trimethylsilyl triflate catalysis, an example of the concomitant formation of the α anomer during the preparation of 2,3,5-tri-*O*-benzoyl-β-D-ribofuranosyl azide by, 359
Trisaccharide components of the repeating units of the capsular polysaccharides of *Streptococcus pneumoniae* types 19F and 19A, conformational analysis of the, 327

Ultrasound and γ-rays, chemical reactions in aqueous solutions of L-ascorbic acid induced by, 291
Uronium triflate, synthesis and properties of 1,1,3,3,-tetramethyl-2-(2,3,4,6,-tetra-*O*-acetyl-α-D-glucopyranosyl)-, 353

Xyloglucans, a comparative study of enzyme digests of apple-fruit cell walls and of alkali-extracted, 303
